

SVRA Competition Bulletin #CB2011-001

Subject: Qualifying and Race Procedures

From: Raymond Snowdon, Race Director

Date: January 1, 2011

In order to maintain the spirit of competition, the following procedures will be followed by SVRA until further notice.

Sprint Feature Races: Qualifying *time* determines Qualifying Race Grid

Qualifying *Finishing Position* determines Feature Race Grid

Enduros: Best *Time* of Practice, Qualifying Sessions and/or Qualifying Race will determine Enduro Grid.

Specialty Races: These special "Marque" races will be treated in the same manner as the Sprint Races. If the schedule has not allowed a Qualifying Race for the "Marque" race, then the best time from previous sessions that *allows Timing and Scoring to set a grid*, will determine Race Grid.

Race Duration: Sprint Races and Specialty Races will be run on a "time plus 1 lap basis" (Ex. 25 minutes + 1 lap race). This method precludes slower cars in a race Group being "penalized" by being lapped by faster cars. No matter what type of car you race in that Group, you will get the same amount of Race Time. This method also allows better schedule flexibility.

Enduros will continue to be "Timed" events.

Note: The SVRA Grid Marshall reserves the right to slot cars into the Grid in the interest of safety.

GRID MARSHALL DECISIONS ARE FINAL
