

SVRA Technical Bulletin #TB2013-004

Subject: SVRA Supplemental Tire Regulations for 2014

From: Roger D. Linton, Technical Director

Date: November 5, 2013

The **SVRA Supplemental Tire Regulations** document is being reviewed for the 2014 season. A number of new tire models have been introduced during the past year and will be considered for inclusion if appropriate and legacy tires that have been out of production for long enough to become a safety concern will be removed.

The intent of these rules remains to specify tires that are a reasonable compromise between the tires raced with during the period and what is currently available. Availability in sufficient sizes to maintain equitable tire performance within the Group and Class structure is of primary importance.

The updated SVRA Supplemental Tire Regulations will be available at www.svra.com/rules/ and contains information on tire selection and requirements for all SVRA Groups.
