SCHR VINTAGE BOOMS	SVRA Supplemental Tire Regulations (Not for Gold Medallion Classes) Revised 5/2025
 Wheel diameter must be as originally fitted unless permitted in (the Spec Sheets). Tires must be mounted following the manufacturers specification for wheel width. Bodywork may not be modified beyond period specifications to accommodate approved tires. 	Since tires are a consumable item, SVRA requires tires that are currently available and are of a reasonable age. There is no doubt that modern tire compounds and construction are vastly improved from what was available to competitors when our cars were originally raced. The intent of these rules is to specify tires that are a reasonable compromise between the tires raced with during the period and what is currently available. Availability in sufficient sizes to maintain equitable tire performance within the Group and Class structure is of primary importance. We are looking for an appropriate level of dry grip for all the cars in a group, to avoid overloading suspension components. Tires are evaluated by looking at their aspect ratio, tread pattern, carcass design and wear rating. Some tire sizes/brands are acceptable based on true tire diameter and cross- section regardless of the listed aspect ratio.
Group 1 - Molded Treaded Tires Minimum aspect ratio of 60, except as listed on the right, tread depth— no less than 2/32" remaining, at all times, over 75% of the tire. Note: Bodywork may NOT be modified beyond period specifications to accommodate listed tires. Wheels may be of an alternate material but must be of period design. They must be the correct diameter and width as specified within the Make and Model Regulations.	Approved Tires: Avon Racing: 5.0/22-13, A29 14297 ACB9 only, A46 17680. 6.0/22-13, A29 514 14198 ACB9 only, (ACB10 not permitted), CR6ZZ Goodyear Eagle: 5.00/15 G12A American Racing: 18/6.0-10 GT Hoosier: 5.0-15 Vintage TD, Speedster 19.0x5.0-10, 20.5x6.0-13, 22.5x6.0-13TDR Vintage FF tires Any Treaded, DOT approved Tires with a UTQG of 100 or greater with appropriate Speed Rating and a minimum Aspect Ratio of 60 For Toyo RA1's and Nitto NT01's, please see page 6 of this document
